# User Manual - Snake Game - ENG

First you have to start the program, it may take a few seconds if you are starting it up for the first time. Then you should find yourself on this page:

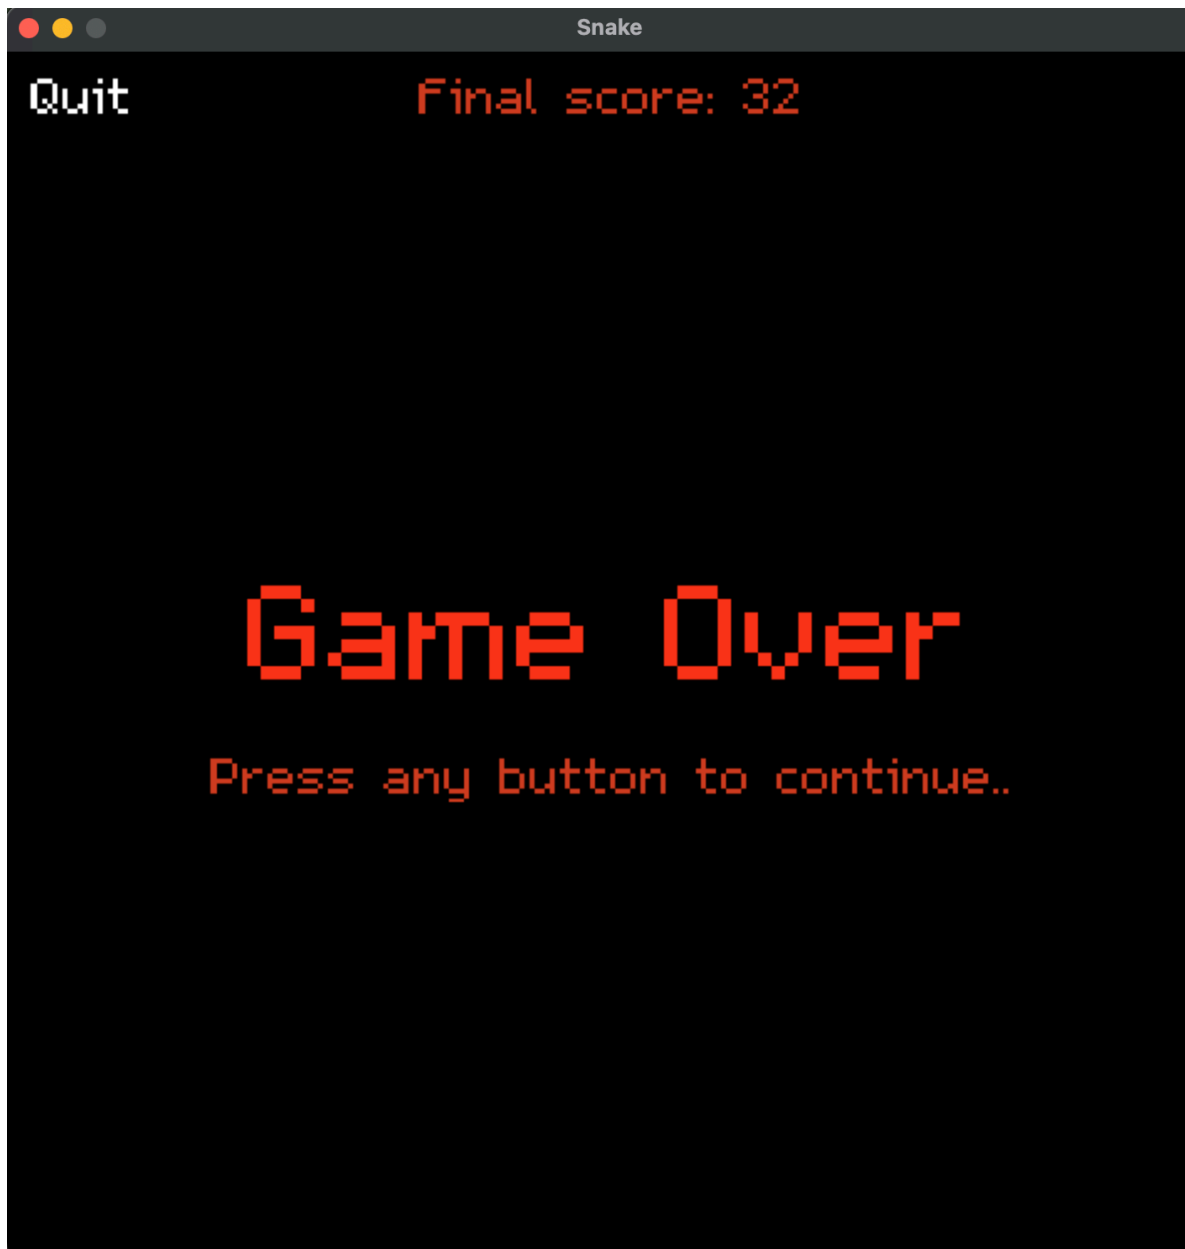

Here you will have to choose between these options by clicking with your left mouse button on them. There are 2 different types of maps, If you are a rookie I suggest you try the Classic map first.

JWX86H

After clicking any of the above buttons you will find yourself in the game seeing this:

This is the objective, just avoid the obstacles and try to eat as many apples as you can, keep in mind that if you eat an apple, the speed will increase by 5%, so be careful because the game will get harder.

After you have accidentally collided with an obstacle you will see this:

Here you can see your final score, this is how many apples you have eaten. You have two options here, either you can go back to the Main Menu or quit the game by pressing the button "Quit".
